

Pioneer Pelvic Pain Clinic

The **Pioneer Pelvic Pain Clinic** has a multidisciplinary approach that provides comprehensive care to patients suffering from endometriosis and pelvic pain. Our dedicated Patient Support Coordinator will work closely with patients, their treating GP and allied health providers to tailor a management plan that is specific to their needs and priorities.

The Pelvic Pain Clinic Team at Pioneer Health

Christine Liao | PATIENT SUPPORT COORDINATOR

Our Patient Support Coordinator, will spend time with the patient collecting information and arranging for any results or treatment reports to be sent to the Clinic in readiness for their GP appointment. Christine will also speak with them about what their priorities are in regards to their treatment plan. Christine will assign the patient a treatment GP and arrange the booking of their appointments. Christine will provide ongoing support to the patient, including co-ordinating appointments and liaising with care providers as required.

Dr Christine Oosterhuis

Dr Carly Roxburgh

Dr Erica Clarke

PELVIC PAIN CLINIC GPs

The GP will have the information collected from the patient's initial appointment with our Patient Support Coordinator. The GP will work with the patient to develop a management plan and liaise with other health providers that may participate in their care (e.g. Pelvic Health Physiotherapist). A follow up appointment will be arranged to review any results, discuss the progress of the management plan and review allied health involvement in the patient's care.

Katie Stan-Bishop | PELVIC HEALTH PHYSIOTHERAPIST

Chronic pain can have an impact on work, school, relationships, sport, sleep, mood and quality of life. Our pelvic health physiotherapist will work with our patients to help them understand their pain and discuss ways to treat and manage some of the challenges they may be facing and optimise their quality of life. Katie holds a post graduate Masters Qualification in Continence and Pelvic Health (Curtin University 2015) and has over 15 years of clinical experience in physiotherapy.
